Appcheck NG and Crowdar announce a new strategic partnership

AppCheck, a market leading Web Application vulnerability scanning platform today announces an alliance with a new strategic partner, Crowdar.

Matt Hawnt, Managing Director of AppCheck, said "We're excited about this new partnership, and the opportunity to work with Crowdar in the fast growing market of Latin America."

In AppCheck, we know we have the cutting edge technology, but to reach customers at the local level we need partners with the reputation and expertise of Crowdar"

Crowdar provides functional and automated software testing services through a vetted crowd of software testing professionals and bespoke automation tools.

Crowdar, with local presence in Argentina and Manchester will be an asset to AppCheck going forward.

Javier Re, CEO, Crowdar, said "We're working hard to compliment our testing services with world-class security testing services. AppCheck give us the possibility to bring automated penetration testing services to our portfolio, which is aligned with Crowdar's strategy, to build and provide automated testing solutions"

ABOUT APPCHECK

Appcheck is a cloud based service that aspires to serve customers in a broad range of territories. Designed and developed by experienced penetration testers, it offers unparalleled detection rates, accuracy and scalability.

ABOUT CROWDAR

Crowdar is a crowdsourced software testing company that specialises in automated and security testing services. Crowdar was a Gartner "Representative Vendor" 2015 - 16 and featured as a Crowdsourced Testing company in Forrester's 2016 report.
